Comments Report

4. Comments:

- ^{4.1)} Please identify what you perceive to be the real strengths and weaknesses of this instructor and course.
- I enjoyed analyzing papers in a critical way, that is an important aspect of science and something we don't get enough practice with in school.
 - I really enjoyed discussing current planetary science topics with my colleagues, something that we should be doing anyways, but is difficult to implement without the demands of a class.
 - To me, this class was what grad school should look like. Reading papers, writing papers, discussing papers in class. I think it should include, for the benefit of the students, at least one meeting during which students could present their work - an important side of grad school that wasn't covered in class.
